

cod2020

Version: 1 (December 13, 2022)

This document is available at Open Science Framework (OSF) (<https://osf.io/zhfyp/>). If you have any questions or suggestions, or you identify a mistake in our documentation or code, please contact us at opr@clin.au.dk.

The dataset **cod2020** contains information on date and cause of death for all individuals living in Denmark between January 1, 1986, and December 31, 2021 (cause of death is available only until December 31, 2020). There is one observation per person with the date and underlying cause of death.

Code: cod2020.R (R code)
Output: cod2020.RData (R file)
cod2020.dta (Stata file)

The dataset is created based on the following registers:

- Register **population1986_2021**, which includes basic information on all individuals living in Denmark between January 1, 1986, and December 31, 2021. We have created this dataset based on the registers from [Statistics Denmark \(DST\)](#) on population ([‘Befolkning’; BEF](#)) and deaths in Denmark ([‘Døde i Danmark’; DOD](#)). Specific details and R code are available on OSF (<https://osf.io/zhfyp/>).
- Register on deaths in Denmark ([‘Døde i Danmark’; DOD](#)) and causes of death divided into deaths until 2001 ([‘Dødsårsagsregisteret’; DODSAARS](#)) and since 2002 ([‘Dødsårsagsregister’; DODSAASG](#)), which provide information from the Danish Register of Causes of Death.¹ The computerized version of the register that we used contains the date of death for all individuals dying in Denmark and Danish citizens dying abroad since 1970.

Dataset **dod2020** contains all dates and causes of death, classified using the *International Classification of Diseases, Eighth Revision* (ICD-8) until 1993, and *Tenth Revision* (ICD-10) from 1994 onwards. The final dataset contains 2,037,697 observations from 2,037,697 unique identifiers with the following variables:

- **pnr**: Unique personal identifier. All individuals born or immigrating to Denmark receive a unique personal registration number (CPR number) containing 10 digits.

Based on different digits' positions, the CPR number contains information on the date of birth and sex. The [PNR number](#) is a de-identified version of the CPR number made by DST that does not include personal information but allows linkage between different registers based on this unique identifier.

- **death_d**: Date of death based on DST's variable [doddato](#).
- **cod**: Cause of death based on DST's variable [c_dod1](#) (until 2001) and [c_dodtilgrundl_acme](#) (since 2002).
- **cod14**: Cause of death grouped into 14 groups (Table 1).
- **cod11**: Cause of death grouped into 11 groups (Table 2).
- **cod11_label**: Variable cod11 with labels instead of numbers (Table 2).

Table 1. Classification of causes of death into 14 groups. This classification is available for the entire period and it is made directly by the [Danish Health Data Authority](#).

cod14	Label	ICD-10 codes ^a
1	Tuberculosis	A15-A19, B90
2	Infectious diseases (ex. TB)	A00-A09, A20-A99, B00-B89, B91-B99
3	Cancer	C00-D09
4	Stroke and dementia	F03.9, I60-I72, R54
5	Diseases of the circulatory system	I00-I25, I27, I30-I52
6	Respiratory diseases	J00-J99
7	Digestive diseases	K00-K93
8	Urogenital diseases	N00-N99
9	Congenital malformations	Q00-Q99
10	Diseases of the perinatal period	P00-P96
11	Suicide	X60-X84, Y87.0
12	Homicide	X85-Y09, Y87.1
13	Accidents	V01-X59, Y10-Y86, Y87.2, Y88-Y89
14	Others	All other ICD-10 codes

Table 2. Classification of causes of death into 11 groups. This classification is available since January 1, 1994 (when ICD-10 was implemented) and it has been used in previous Danish research.²

cod11	Label	ICD-10 codes
1	Infectious diseases	A00-A09, A15-A99, B00-B99
2	Cancer	C00-D09
3	Diabetes mellitus	E10-E14
4	Diseases of the circulatory system	F03.9, I00-I25, I27, I30-I52, I60-I84, I86-I99, R54
5	Respiratory diseases	J00-J99
6	Digestive diseases	K00-K69, K71-K93
7	Alcohol misuse	F10, I85, K70
8	Suicide	X60-X84, Y87.0
9	Accidents	V01-X59, Y10-Y86, Y87.2, Y88-Y89
10	Homicide	X85-Y09, Y87.1
11	Others	All other ICD-10 codes
